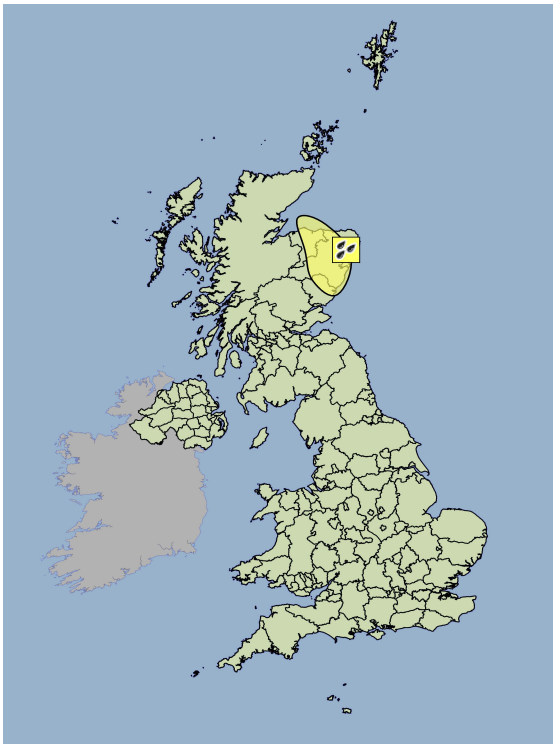
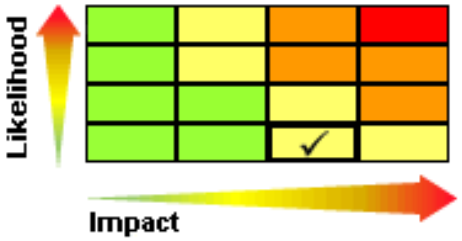
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
Rain is expected to turn heavy for a time as an active front edges into the area from the North Sea. There are larger than average uncertainties over rainfall amounts, and many places are likely to see little disruption. However, given recent wet weather, there is a risk of local impacts.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **21:00 on Sat, 15th Nov 2014** until **09:00 on Sun, 16th Nov 2014**

The heaviest rain has moved away now, so the warning has been cancelled.

Rain, locally rather heavy at times, will spread southwestwards into eastern Scotland during Saturday evening and last into Sunday. Following recent wet weather, this additional rainfall means that the public should be aware of an increased risk of surface water and spray.

This is an update to the alert first issued on Friday afternoon, to include parts of Moray.
